

POOLVERGNUEGEN

A HAYWARD® Company

The PoolCleaner™

PRESSURE CLEANER

Performance, Reliability & Simplicity Redefined

Poolvergnuegen literally means pool pleasure. Experience Poolvergnuegen and see how The PoolCleaner efficiently and reliably works to clean any type of pool.

www.thepoolcleaner.com

Experience Poolvergnuegen, a Hayward Company and a revolution in pool cleaning.

The PoolCleaner™ is a booster pump-free pressure cleaner that can suit any pool size. Patented features such as self-adjusting turbine vanes ensure maximum power at any flow and effortless debris management along with the patented debris bag with internal sock to prevent debris escape. Robust tire treads and unique venturi suction ports work in concert with programmed steering to ensure easy wall-climbing, obstacle management and maximized pool coverage while delivering the best surface clean.

Feature/Benefits:

Pressure PoolCleaners

Self-Adjusting Turbine Vanes

All of The PoolCleaner models have patented self-adjusting turbine vanes. The flexible vanes ensure maximum power at any flow, their ability to move allows easy passage of large debris to ensure full cleaning with peace of mind.

Steering System

The PoolCleaner has multiple pre-programmed internal steering sequences, which cause the left wheel to periodically reverse, allowing The PoolCleaner to turn and then move into another direction. This feature ensures full pool coverage and efficient cleaning. The Pressure PoolCleaner travels 12 to 20 ft. before turning (turns ranging from 90 to 540 degrees).

Robust Tire Treads

One look and you will see the patented tire treads give The PoolCleaner enhanced climbing ability and obstacle maneuverability – especially with main drains. This makes The PoolCleaner ideal for all pool surfaces and shapes.

Extra Large Dirt Bag

The Pressure PoolCleaner has the largest debris-holding capacity bag currently offered on the market, capturing all forms of debris. This patented debris bag has an internal sock that acts as a check valve preventing debris from escaping once the cleaning cycle ends.

Fast and Easy Snap Swivels

These unique patented hose swivels allow for fast and easy assembly and installation of your new Pressure PoolCleaner. The swivels snap to connect the 6 ft. hose sections. They prevent the hose from coiling and leaking, allowing for the best possible performance from your PoolCleaner.

Pressure Relief Valve

The Pressure PoolCleaner comes with a pressure relief valve that regulates the pressure flow to the Pressure PoolCleaner. This relief valve regulates the pressure to ensure best performance and optimal pressure is not exceeded by 12-15 PSI or 11-16 RPM. It does so by opening to bypass water when necessary. There is NO screen to clean due to the over-sized venturi jet.

*Optional tape tires may be required for smoother surfaces.

Choose from two models:

Pressure PoolCleaner
Part Number:
896584000-037

Limited Edition

Optional Accessories

The PoolCleaner Keeper™

The PoolCleaner Keeper provides ideal storage for when your cleaner is not in use. It prolongs the life of your PoolCleaner hoses as it eliminates coiling. Keep your cleaner safe and out of the way with The PoolCleaner Keeper.

Poolvergnuegen Tape Tires

Optional replacement tires available for pressure cleaners. Perfect for smooth or slippery pool surfaces such as: tile and/or fiberglass pools (tires are solid beige color and come as a pack of two).
