

PRESSURE PoolCleaner™ FEATURES

The PoolCleaner™ is made in the USA

Great Coverage- Spends more time in the shallow end than other cleaners. Internal steering system, means NO unreliable backup valve.

Patented Power Adjusting Turbine maximizes the pressure from your pump. It also pushes the dirt up into the bag. The PoolCleaner™ runs optimally at 11-15psi. Little to no increase in back pressure on the system.

Energy Sweep. No need for booster pump.

No sweep/whip hose that puts dirt into suspension.

Extra large dirt bag.

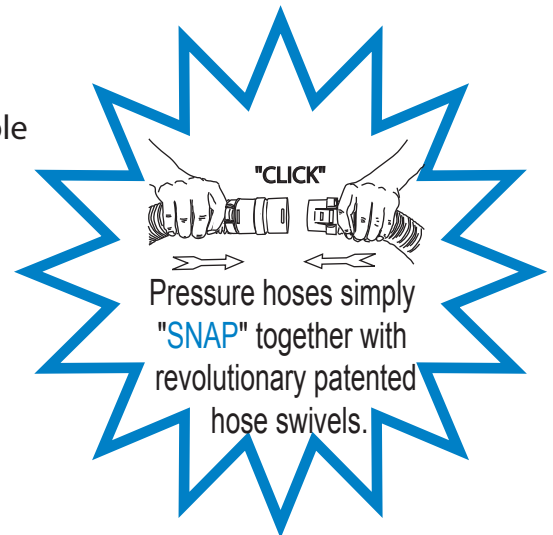

Pressure relief valve with NO screen due to HUGE venturi jet.

Largest vacuum path with massive inlet.

Pressure Hoses simply SNAP together with revolutionary no leak, no coil hose swivels.

Installs quickly and easily with no tweaking necessary.

Highest quality hoses.
